Fibo Väggskivor

Fibo väggskivor består av 7-lags plywood med högtryckslaminat på framsidan. Det blanka och starka ytskiktet är helt vattenavvisande och tål stora temperaturskillnader. Samtliga skivor levereras med Fibos unika AquaLock-lås. Monteringen är enkel och kan göras direkt på befintlig vägg eller i reglar. Skivorna är lätta att kapa och kan anpassas efter kundens exakta behov.
